**Fair incentive**

*From David Mason*

Brian Farrington suggests that people who do not want wind power on their doorstep should be offered an incentive to accept it (2 February, p 28). I suggest that for equity those affected by thermal power stations should be offered an incentive, backdated to when the facility was built. While we are at it, how about those affected by overhead power lines?

Or we could just accept that we have our part to play as citizens.

*Swindon, Wiltshire, UK*

*NewScientist, 2013*
